MR. JOSEPH MURIMI, MALD, PHD (IP)

You have transformed lives!

02

This is my message to everyone - You have transformed lives... You have made the difference in 2021! People cried out to you with their troubles and you supported. I am so very thankful for the impact you are making in the lives of our beneficiaries, and the people that we serve.

It was a tough year globally but through you our very compassionate donors who have supported us every step, Save a Life has managed to at least remain operational. We are grateful for your kind support this difficult pandemic era.

Amazingly, we were able to expand our youth training studio this year. In 2022, we hope to get sponsors who will help us procure more training equipment, so we could make even greater impact.

CURRENTLY, YOU HAVE EMPOWERED OVER 2,600 YOUTH THROUGH THIS PROGRAM.

...cont'd

Another outstanding program this year has been our medical fundraising program. As times became tougher, we were faced with a greater responsibility of critically ill individuals who could not access medical care.

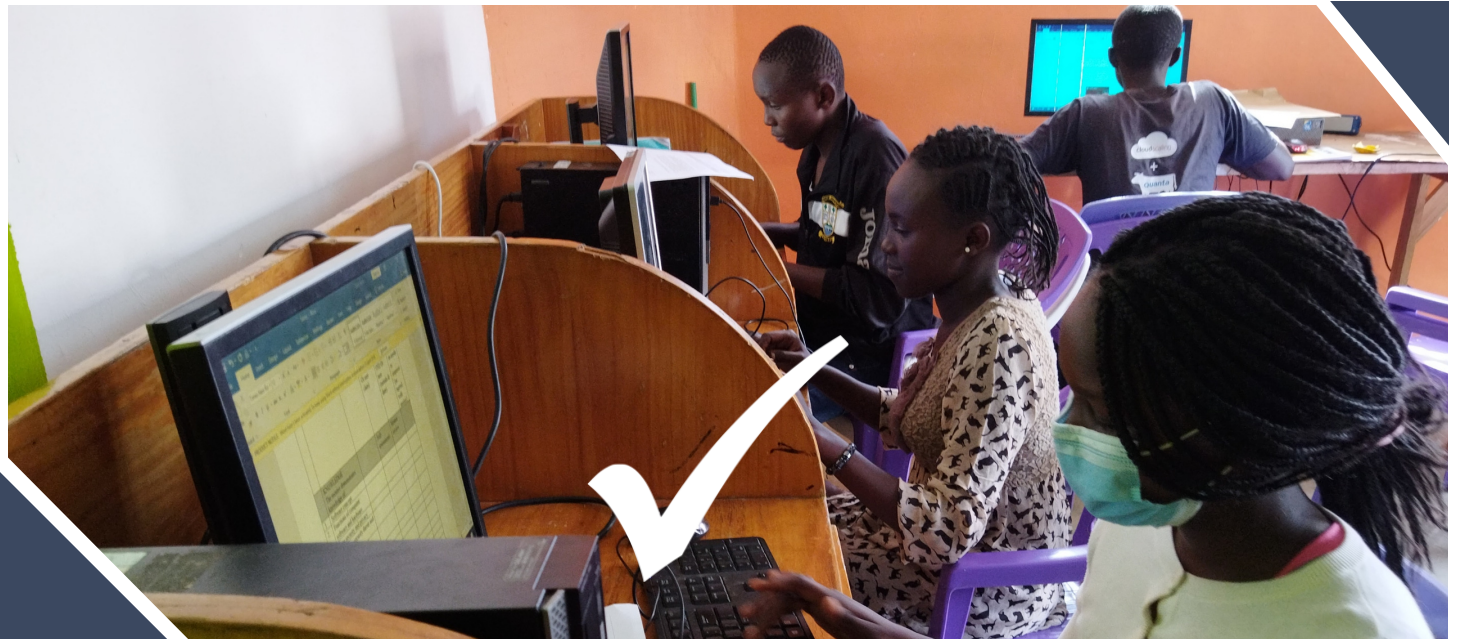

TO THIS END, OUR EVER-CARING SUPPORTERS HAVE SAVED OVER 958 LIVES SO FAR.

Honestly, we did not expect to hit that record – at least not this year. But God has been exceedingly faithful, and our supporters likewise have come through in a huge way. We would not have achieved this without all of you!

To our wonderful volunteer staff with their families, our partners and donors, we want to say a huge thank you. May God bless you all and as you plan for your new year goals, may He make your cups overflow, watch over you, and fill your good hearts with peace.

Joseph Murimi

Founder & Executive Director,
Save a Life Community

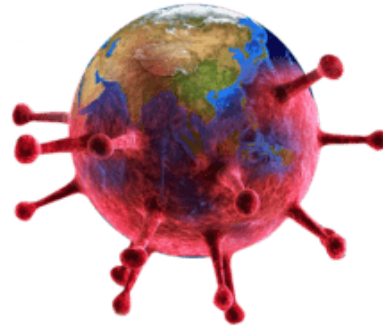

The Unpleasant

05

Last year we were set for great big development agenda before the global COVID-19 pandemic hit. We had plans to scale up all our programs in order to achieve more community impact and transform more lives!

This meant that we were going to expand the capacity of our youth empowerment program; sponsoring more youth for media skills training, conduct more street feeding events than any other year before, save & rehabilitate more street kids in our street kids' welfare program, and fundraise for a needy patient every week throughout the year.

STAY HOME

While all these plans seemed very achievable and solid before the pandemic, we barely achieved our targets. The government's COVID-19 guidelines out-rightly crippled our street feeding events as all gatherings were banned.

We also had to reduce the admission capacity of our youth training studio to a bare minimum.

As if this was not enough, our street kids' welfare program was hanging on a thread since we really could only reach out to street children in controlled numbers. The harsh economy that would soon unfold meant that people were struggling financially, and so fewer donors had the ability to donate. From the annual statistics in that dreadful year, private companies and big retailers were pushed to the limit – well, it was twice as hard for nonprofits.

Nonetheless, we braced ourselves for the new times and made unpleasant decisions that would help us to push on.

In a nutshell, we decided that in the year 2021, we were going to reduce all our programs to sustainable level.

THIS WAS DIFFICULT, BUT IT WAS THE ONLY WAY WE WOULD ENSURE THAT SAVE A LIFE COMMUNITY REMAINED OPERATIONAL FOR THE PEOPLE WHO NEED US MOST.

Our volunteer staff adhered to all COVID-19 guidelines; wearing masks and protective equipment while on field, maintaining social distance, and mostly working from home.

Now as we approach the end of the year 2021, we can say that it has been quite a slow but sure recovery.

Looking back, we were not certain that we would make it here. A big thank you to all of you who helped Save a Life push through; with your donations, emotional support and continued patronage. You are life savers, you are Save a Life Champions!
